

Instructional Practices Workshops

ALWAYS TIME FOR SCIENCE

Time is something that all teachers wish they had more of! Especially in elementary school, it can be difficult to find time to teach science the way that it should be taught. In this session, our experienced STEM coaches will assist teachers in identifying and creating practical, high-impact strategies for teaching science—especially when time is limited. Expect to engage in hands-on learning designed around the understanding that time is often a constraint. Graphic organizers and easy-to-use formative assessments will be introduced and utilized throughout the session.

The Outcomes

Participants will:

- Work with daily schedules to learn how and where science can be incorporated.
- Experience valuable structures and strategies that will save time and maximize learning.
- Gain tips on how to make the most out of the science time you have through cross-curricular integration.

The Offer

Allow us to customize your professional learning session to address your district's or school's unique needs, resources, and schedules. Face to Face 3-hour session for up to 50 participants @ \$1600.00 OR Self Paced Online Course @ \$39.00 per participant (coming soon!).
