

Amid school closures due to COVID-19, STEMscopes enables existing users to continue instruction through web-based curriculum

HOUSTON – March 11, 2020 –Given the growing concerns regarding COVID-19 (aka coronavirus), we understand that many STEMscopes schools may enact precautionary and/or cautionary measures to ensure the health and safety of their students and faculty in the coming weeks. Here at STEMscopes, we strive to support our customers in any way we can, and want you to know that we are here for you during this time of uncertainty.

In the event that your campus undergoes a temporary closure, or students and faculty are required to stay home, our web-based curriculum allows current STEMscopes users to continue regular math and science instruction. STEMscopes is designed for both teachers and students to have easy access from any device at any time, regardless of location. Teachers can assign tasks, students can complete assignments, and all resources are printable for students who do not have internet access at home.

“As schools experience temporary closures due to the impact of the coronavirus outbreak, STEMscopes enables continuity of learning throughout the transition from school to home and back,” said Vernon Johnson, president and CEO of Accelerate Learning. “We are pleased to offer users the flexibility to continue math and science instruction with our cloud-based curriculum available at school, from home, and anywhere with internet access and on any device.”

Please visit https://stemscopes.com/resources/stemscopes_online_access_during_covid_19_school_closings.pdf for more information on how existing customers can access STEMscopes from home.
