Accelerate Learning Announces STEMscopes Math, Available Nationwide in June

New digital curriculum creates meaningful math experiences for real-world application

HOUSTON – May 19, 2020 – [Accelerate Learning](#) today announces the national release of its first core mathematics program, [STEMscopes™ Math](#). The math curriculum will be available nationwide in June for grades 3-5.

“How many times have math teachers heard students ask, ‘Why do I have to learn this?’ or ‘When will I ever use this outside of school?’

STEMscopes Math disrupts the traditional model of math teaching by empowering teachers with hands-on lessons that motivate students to explore and make sense of math,” said Vernon Johnson, president and CEO of Accelerate Learning. “By creating real-world context and supporting 21st century learning, STEMscopes Math helps students develop the skills and the confidence to successfully solve math problems, instead of just trying to get the ‘right answer.’”

STEMscopes Math is aligned to the Common Core State Standards. It combines digital and print components with hands-on kits to provide teachers with everything they need to create meaningful math learning experiences for students. The digital curriculum materials for students are also available in Spanish.

Using the 5E plus Intervention and Acceleration lesson model, STEMscopes Math makes math relevant by revealing the wonder of math in the everyday world. It provides interactive learning using the Concrete Representational Abstract (CRA) approach. The curriculum features inquiry-based math investigations, virtual manipulatives, and interactive games that engage students as they build their understanding. In addition, it encourages exploration with open-ended, cross-dimensional tasks, and it drives purposeful math discussions to boost student collaboration and growth.

STEMscopes Math includes benchmark assessments for grades 3-5 to provide standards-based data and Quantile measures that track student progress and inform instruction. It features embedded strategies for diverse learners, including English language learners and students who need additional support.

STEMscopes Math is the newest addition to the award-winning suite of [STEMscopes](#) solutions. For more information, visit <https://www.stemscopes.com/math>.

About STEMscopes

STEMscopes, created by Accelerate Learning Inc., is an award-winning, research-based national leader in PreK-12 STEM curriculum. Used by over 5 million students and 250 thousand teachers across all 50 states, STEMscopes provides comprehensive digital resources, supplemental print materials, and hands-on exploration kits that drive engagement and academic growth. For more information, visit stemscopes.com or call toll-free 800-531-0864.
