

Instructional Practices Workshops INTEGRATING TECHNOLOGY

Technology can extend our abilities and is vital to college and career readiness. Although technology should never replace hands-on science, it is sometimes difficult for teachers to balance both. In this session, participants will experience seamless technology integration in the STEM classroom that will encourage reflective practice. There is no better time to harness the tool of technology for authentic STEM lessons, simulations, and assessments.

The Outcomes

Participants will:

- Learn useful strategies for including technology in your classroom
- Discuss the benefit of simulations and their effectiveness
- Experience benefits of technology within assessments

The Offer

Allow us to customize your professional learning session to address your district's or school's unique needs, resources, and schedules. Face to Face 3-hour session for up to 50 participants @ \$1600.00 OR a Self-Paced online course @ \$39.00 per participant.
