SCIENTIFIC INQUIRY: UNDERSTANDING THE 5E-INTERVENTION AND ACCELERATION

Research has shown that the actual doing of science or engineering will pique students' curiosity, capture their interest, and motivate their continued study. Our professionally trained STEM coaches are ready to open your eyes to a whole new world of science inquiry! A customized professional learning session can be designed to honor what participants know, then take them to the next level of implementing science inquiry in their classroom.

The Outcomes

Participants will:

- Understand the meaning of inquiry and what this looks like in a classroom
- Gain strategies to move teachers from a teacher-directed structured classroom into a more open-ended experience that allows for student input and individual exploration
- Experience, through hands-on learning, how to build student-centered, engaging instruction into your science classroom

The Offer

Allow us to customize your professional learning session to address your district's or school's unique needs, resources, and schedules. Select the delivery method that works best for you: Face to Face 3-hour session for up to 50 participants @ \$1600.00 OR a Self Paced Online Course @ \$39.00 per participant.
