UNDERSTANDING AND IMPLEMENTING CLAIM-EVIDENCE-REASONING

Claim-Evidence-Reasoning is a way for students to scientifically describe what they have observed and learned through an investigation, experience, or research. By making claims based on evidence, students are able to connect their science knowledge to the events and observations of the real world. Our professional STEM coaches understand the importance and power of C-E-R! Allow us to customize a session of enjoyable learning for your district or campus. This engaging, interactive, hands-on session will give participants the opportunity to experience and implement this highly effective strategy that will instantly increase rigor in a classroom.

The Outcomes

Participants will:

- Understand the meaning and application of a claim, evidence, and reasoning
- Experience a variety of hands-on examples and how to adapt among grade levels
- Discuss rebuttal and when/where it would be appropriate to implement
- Gain examples and ideas that can be taken back to the classroom

The Offer

Allow us to customize your professional learning session to address your district's or school's unique needs, resources, and schedules. Select the delivery method that works best for you: Face to Face 3-hour session for up to 50 participants @ \$1600.00 OR a Self Paced Online Course @ \$39.00 per participant.

designed for grades
