

Data driven decision making is a way of working that values curriculum decisions made by teachers by backing them up with verified and analyzed data. STEMscopes wants to be sure that districts always have the data they need to inform curriculum. Data not only identifies areas of need, but can also determine what is working. In this session, we will take you on a data journey and allow you to experience first hand that data you have at your fingertips!

The Outcomes

Participants will:

- Learn about the different data reports available within STEMscopes
- Understand the different administrative roles and view data available for each
- Experience how the data can be used to assist teachers
- Create a campus/district plan that is data driven

The Offer

Allow us to customize your professional learning session to address your district's or school's unique needs, resources, and schedules. Face to Face 3-hour session for up to 50 participants @ \$1600.00.

face-to-face learning

available as a webinar

The Audience

Pre-K-12 classroom teachers, teacher leaders, school administrators, curriculum specialists, and instructional coaches.
