

Let's take a deeper dive into all the resources STEMscopes has available to support teachers and scholars with science instruction. Follow Up/Advanced Implementation Training provides a look into all the additional elements and tools available within STEMscopes that were not covered in the initial implementation training. Participants will experience STEMscopes at its finest as they take a hands-on walk through the Teacher Planner, Assessment Builder, Video Glossary, Teacher Toolbox, and much more. Walk through the student side of STEMscopes. Work with the data created and experience the path it takes once an assignment is completed. This is a MUST HAVE session for all STEMscopes users.

The Outcomes

Participants will:

- Receive in-depth explanation of program elements with suggestions for application
- Learn how to create an effective standards-based assessment
- Identify support for differentiated instruction
- Become familiar with data collection and analytics reports
- Reveal buttons and tabs that you never knew existed

The Offer

Allow us to customize your professional learning session to address your district's or school's unique needs, resources, and schedules. Face to Face 3-hour session for up to 50 participants @ \$1600.00

face-to-face learning

available as a webinar

The Audience
